RETHINKING METHANE:

ANIMAL AGRICULTURE'S PATH TO CLIMATE NEUTRALITY

The American Dairy Association Mideast and Ohio Beef Council invite you to join us for a free webinar to learn about animal agriculture's environmental footprint. Rethink what you thought you knew about methane emissions and discover how animal agriculture is on the path to climate neutrality with scalable solutions and tools to fight global climate change.

FEATURED SPEAKER

FRANK M. MITLOEHNER, PHD

Dr. Frank Mitloehner is a professor and air quality specialist in cooperative extension in the Department of Animal Science at UC Davis.

Frank received a Master of Science degree in animal science and agricultural engineering from the University of Leipzig, Germany, and a doctoral degree in animal science from Texas Tech University.

OBJECTIVES

- Explain sources of global and regional greenhouse gases.
- Explain how methane from cattle is produced and destroyed, and the natural cycle it is part of.
- Discuss a new and more accurate way to measure methane's climate warming impact.
- Discuss solutions to methane mitigation.

REGISTRATION DETAILS

This webinar is approved for 1.0 hour of continuing education credit by the Commission on Dietetic Registration. **Register by April 30, 2021 to reserve your spot!**

Mark your calendar for May 17 Part 2: "Ohio's Role in a Sustainable Food System" for discussion and Q&A with an expert panel.
